We invite you to attend our Networking Event

The Future of Urban Observatories and Inclusive Data Systems

The World Urban Forum

Organised by:
National Institute of Urban Affairs, India (with Institute of Development Studies, UK as partner) and PLANMalaysia, Federal Department of Town and Country Planning, Malaysia

The event envisions the importance of creating “culture of data” in optimizing the city operations through big data platforms as well as on data analytics through urban observatories to enable evidence based policy formulation. The use of innovative technologies and platforms will collect, generate and analyse data to generate insights for an integrated approach towards data driven governance.
