Title of Event

SDGs in Action: Localization of SDG 11 for achieving sustainable urbanization through Urban Planning Tools

Organization Details

Organization: Institute for Spatial Planning and Environment Research, India (ISPER)

Organization Country: India

Summary

Will address global challenges of massive urbanization and spatial planning. It will aim to discuss innovations relating to urban planning and management in pursuit of balance between the needs of the present and those of future generations. Urban areas are seen as drivers of sustainable development by applying sustainability targets and have been identified “as a key for sustainable development and climate change”. Thereby, urban areas present multiple challenges and a range of opportunities. Session has been framed on strong urban spatial strategies to provide a platform to help alleviate several current and anticipated social, economic and environmental conditions for 54% urban world in 2016 and rising to 66% during next 20 years. Session has been built upon guiding principles of New Urban Agenda, SDG 11 and International Guidelines on Urban and Territorial Planning and issues of Climate Change. The best-case innovations and policy implementation will be show cased. The outcome will be helpful to the cities struggling for creating indicator systems for spatial planning, integration of SDGs into the city plans and their monitoring for urban transformation, resilience towards climate change. and sustainability
