Event Details

Title of event
The International Municipal Investment Fund - IMIF: Facilitating Cities' Access to Capital Markets

Organization Details
Organization: UCLG
Organization Country: World

Summary
The International Municipal Investment Fund is a unique, bespoke fund designed and set up by UNCDF and UCLG with the collaboration of FMDV to support cities and local governments (notably municipalities in developing countries including the least developed countries) in accessing national and international capital markets. It will provide cities and local governments with reimbursable funds to finance investment projects and programmes of general interest. The Fund will be managed by Meridiam, a private asset manager, with a target capitalisation of € 350 million at first closing. Through a Technical Assistance Facility (IMIF-TAF), the UNCDF - UCLG/FMDV coalition will help cities to finalise the preparation of their projects and provide the necessary support to ensure that the city meets the requirements for accessing financial markets.

The session will present the context, objectives and action plan of the Fund and engage in a debate with the audience, including on the modalities and conditions for cities and LGs to access the Fund.
