**Event Details**

**Title of event**
Building a Culture of Inclusion and Linguistic Diversity in Cities

**Organization Details**
**Organization:** World Enabled  
**Organization Country:**

**Summary**
The objective of the event is to raise awareness and share with participants tools that can be utilized to build a culture of inclusion in cities, through respect of linguistic diversity and provisions for accessible documents.

The event will bring together stakeholders representing cities and civil society to discuss how to build a culture of inclusion, and the importance of linguistic diversity in urban planning strategies and design.

Complementing the discussion of the panelists and as a follow up from the Townhall on Inclusive and Accessible Cities, which took place in November of 2019 during the United Cities and Local Governments World Summit on Local and Regional Governments, the accessible versions of the Policy Paper on Inclusive and Accessible Cities will be presented during the event.

Preparing and distributing documents in accessible formats is a key way forward for cities as they develop inclusive urban development strategies and programs, and a cornerstone to the decade of action; ensuring no one is left behind.

The outcomes of the event will be a transfer of knowledge to cities and other stakeholders on tangible methods to implement inclusive and measurable urban development programs and highlight the leadership of UCLG in mainstreaming universal design principles and bridging the gap between cities and civil society.

**Other Organization name**
UCLG World Secretariat

**Prospective moderator, speaker(s) or panelist(s)**
