9:00 AM

TE 47 - Build Back Better (BBB): The Case of the Rmeil Cluster in Beirut
Live Love Lebanon and the United Nations Human Settlements Programme
(UN-Habitat) - Lebanon **Multifunctional Hall: Room 15**

The 4 August 2020 Beirut Port explosion caused widespread destruction to homes, businesses, infrastructure, and disrupted economic activity. It also struck the vibrant, cultural heart of Beirut, recognized for its social and cultural identity with a historical built environment embedding a concentration of cultural landmarks, heritage buildings, restaurants, bars and other social spaces that attracted both tourists and residents alike.

UN-Habitat and Live Love Lebanon together with their partners are executing a multisectoral Beirut Port explosion response and recovery project within a cluster in Rmeil (Beirut) that is centred on the rehabilitation of 11 multi-story residential buildings of heritage value and the common spaces surrounding the area through a holistic and Build Back Better approach.

JOIN US!

The training aims to provide participants with knowledge and skills to apply the Build Back Better approach to urban rehabilitation, rebuilding and disaster recovery projects based on practical experience and lessons learned.
